

Add 30 Extra Horsepower in 30 Minutes!

With **THUNDER** **MAX**, You Can... *Go Racing!*

- Installation is quick and easy - The **N.A.D.S.** system is 95% pre-built and takes about 30 minutes to install!
- Compatible with ThunderMax Open or Closed Loop Systems (*sold separately*)
- No bulky fuel pumps, fuel lines, or sandwich plates required!
- Includes: Backing plate, Zipper's high-flow ThunderBird air filter, arming switch, nitrous solenoid, and injector nozzle
- Brackets available to mount the show polished 12-oz bottle to Softails®, Dynas® and FLs®
- Designed for 88"-96" EFI TC Engines

ThunderMax is pleased to introduce **N.A.D.S.** (Nitrous Assisted Dry system) for EFI Twin Cam® bikes! **N.A.D.S. is a complete bolt-on "dry" system that requires no secondary fuel source (the ThunderMax fuel injection system supplies the precise amount of extra fuel).**

Installing your **N.A.D.S.** is simple: the kit includes everything needed for a quick, clean and efficient installation. System management is provided by a ThunderMax EFI Module (*sold separately*).

The nitrous system is integrated into the backing plate which includes a high-flow ThunderBird air filter, arming switch, nitrous solenoid, and injector nozzle. Just mount the bottle, install the air cleaner backing plate, plug the harness into the factory wiring harness, **and away you go!**
