

# Zipper's Thunderbird Air Filter Kits

## Thunderbird Max-Flow Air Filter Kit

Here's a nice power increase that's easy to install and easy on the budget! The Thunderbird Max-Flow air filter kit is designed to replace the stock air cleaner assembly with our Max Flow element. This cleanable/oilable, pleated element is over 2-3/4" deep to really let that engine breathe! Also included is a one piece cast backing plate with internal crankcase venting and mounting hardware. Fits fuel injected and carbureted Twin Cam® engines equipped with the factory TC88 "football" cover. Available with standard aluminum cast, black or chrome plated backing plate. **Bolt it on and feel the difference!**

117-440C

### DESCRIPTION

### PART No.

Fits '99-'08* Big Twin engines, cast finish	# 117-440
Fits '99-'08* Big Twin engines, black finish	# 117-440B

Replacement 2-3/4" Max-Flow element	# 172-114

\*Does not fit 2008 Touring models

## Thunderbird High-Flow Air Filter Kit

This kit is similar to the ThunderBird Max Flow air filter kit except the filter is the standard 2-1/4" deep. This filter kit increases flow without increasing the overall width of the air cleaner for those with leg room concerns. Fits fuel injected and carbureted Twin Cam® engines equipped with the factory TC88 "football" cover. Available w/ standard aluminum cast, black or chrome plated backing plate.

High-Flow 2 1/4"

## Thunderbird A/C Upgrade Kit

Is your bike already equipped with a factory performance air cleaner? Raise the level another step! Our ThunderBird Max-Flow upgrade kit includes a specially designed, pleated fabric filter that is 5/8" deeper than the factory performance filter it is designed to replace. With more surface area, more airflow is achieved (9+%); more power is the result. The kit includes our exclusive washable filter and mounting hardware, and takes about 5 minutes to install on any engine equipped with the factory performance filter # 29440-99D, 29773-02C (TC®) or # 29543-99B (EV).
