

Thank You for contacting ThunderMax product support.

How to Upgrade Firmware-

Link to ECM and in the Main Menu of your software go to:

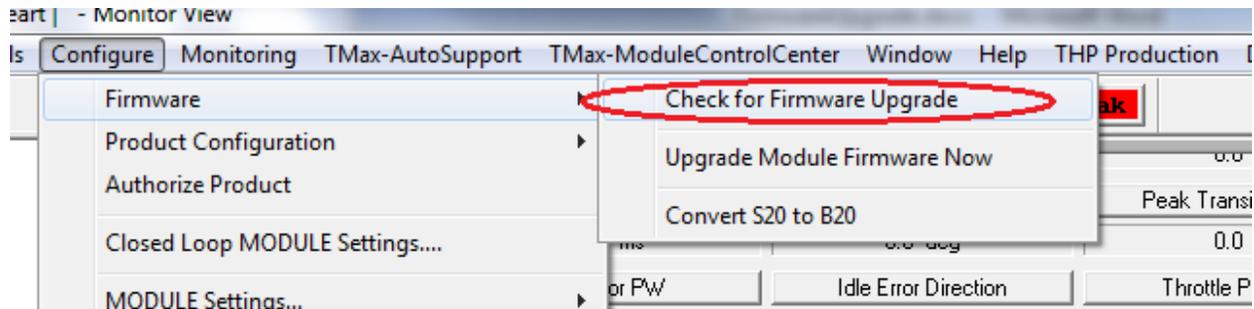

- **Help->Module Upgrade History**

Here you will be able to see which version of the firmware you are currently running.

Now in the Main Menu go to:

- **Configure->Firmware->Check for Firmware Upgrade**

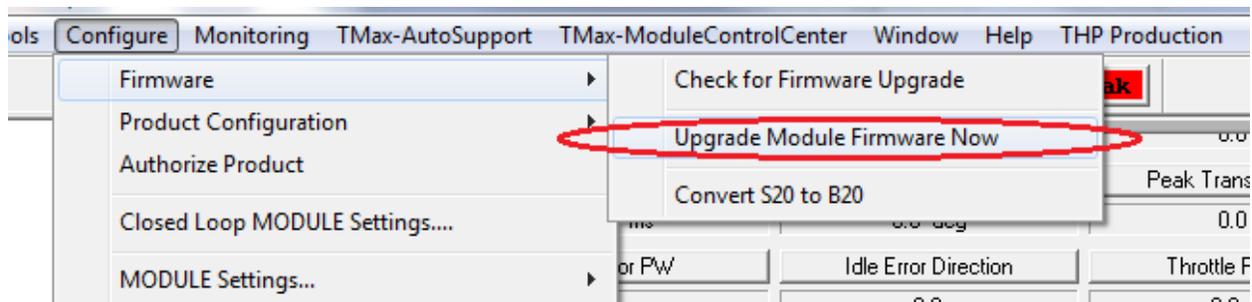

From the list, choose the file marked “*Latest Version*” and click OK.

Once the firmware has been downloaded successfully you will be prompted to “Upgrade Module Firmware Now” using this file.

To do this, in the main menu go to:

- **Configure->Firmware->Upgrade Firmware Now**

When finished, a window will appear that says “*Firmware Upgrade Complete*”. Click **OK** and you are done.
