

# THUNDER MAX

\* CA Proposition 65 "known to the state of CA to cause [cancer][birth defects or other reproductive harm]" see [www.p65warnings.ca.gov](http://www.p65warnings.ca.gov) for details

## EA7000 FAN - Oil Cooler 2017-up Air Cooled M8® Touring® Models

excludes 2018 FLTRXSE® and 2019 FLHXSE® (both have a empty fan shroud in place)

**\*\*\*Plug and play with ThunderMax\*\*\* HD® ECM requires dealer to flash fan on.**

*Thank you for purchasing a ThunderMax Oil Cooler Fan! Please read through the following instructions before beginning the installation procedure. Following these instructions will ensure that your Fan is installed properly for optimal results.*

### Installation

#### 1) Remove oil cooler shroud

- Carefully pull outward at the bottom to unsnap the pins
- Tilt shroud upward to unlatch upper clips.

#### 2) Loosen oil cooler

- Remove 2 oil cooler bolts

- Gently pull outward on cooler, slide fan assy upward into place (notch is the top side)

- Remove connector plug from bike fan harness, plug the fan connector in.

- Start the supplied (2) bolts with washers through oil cooler bracket, align fan bracket then tighten the bolts
- From the bottom side install lock nuts tighten in place

- Reinstall oil cooler shroud
